

“Awaken” your metabolism and help your body burn fat naturally!

A sluggish metabolism can occur when you cut food intake, yo-yo diet, lack exercise, and even happens with aging.

Vi-Slim® Metab-Awake Tablets offer a healthy boost to your metabolism that will burn fat and promote lean muscle mass without leaving you jittery. You can increase your daily amount of calories used by as many as 85–125 calories, which equates to about 10–15 pounds of weight per year.

Why is our formula better than others?

1. Ephedra and stimulant free. Won't cause jitters that other brands can.
2. Helps your body's natural fat burning process.
3. Can help you lose up to an extra 10–15 pounds per year.
4. Can be used to lose or maintain weight.
5. Contains Yerba Mate extract, a powerful herbal antioxidant.

What's in Vi-Slim®?

1. Proprietary Ephedra-free formula.
2. Contains the only patented, clinical research validated form of **Coleus Forskohlii** extract in the world! This patented phytonutrient extract has been clinically proven to help promote lean body mass, and enhance mood.
3. **Yerba Mate** and **Cocoa Extract** to get your metabolism running, suppress appetite, and enhance mood.
4. **Green Tea** for natural extra fat burning!
5. **ForsLean™** clinically proven to burn fat and promote lean muscle mass
6. **Chocoamine™**, a cocoa extract that helps boost your metabolism and increase energy
7. **Evodiamine extract** increases metabolic rate and helps burn fat.

* Daily Value (DV) not established.

**ForsLean is a registered Trademark of Sabinsa Corporation. Patent #5,804,596

*** Evothin™ Evodiamine 98%.

Did you know...

Men can eat more food, and lose weight more quickly than women, because they have more muscle. Healthy women have at least 5-10% more fat than men, making it harder for us to lose weight. Each pound of muscle burns 35-50 calories per day, versus a pound of fat burning 7 calories. Women as a result also tend to have lower bone density. So it is important to exercise when dieting, so that we burn fat, maintain or increase our lean muscle mass and improve our overall health.
